Software Engineer Peapod Propulsion Labs

Chicago, Illinois, Unites States

Member of the Web Center team, in charge of developing and maintaining several public websites. Some of my daily responsibilities include:

- Working in Agile team directly with product owner, business analysts and other team members.
- Designing and implementing new features using TDD (Test Driven Development).
- Improving software quality, reusability, extensibility and consistency.
- Verifying and validating features via unit testing, integration testing and automated acceptance testing (Serenity BDD).
- Collaborating closely with other teams like QA or Unix team.
- Participating to the support rotation and troubleshoot production issues to insure the continued operations of the business.
- Main technologies used : Java, Spring, Camel, OSGi, OAuth2, Serenity.

Java EE Developer Fujitsu Technology Solutions

Luxembourg City, Luxembourg

Arquillian is a tool, made by JBoss, which allows developers to test the components of their application in a container:

- Made a solution to improve the way to use Arquillian.
- Improved the company test process by the creation of a Maven plugin which generates an Arquillian test class.
- Automated search of dependencies needed for the archive deployed on the server.
- Utilized Maven, JUnit, EJBs, Cobertura, and many other tools and frameworks.

Analyst Programmer Sailendra

Nancy, France

Sailendra created a technology of user profiling. That technology creates a profile of each user and predicts their comportments based on their actions and artificial intelligence algorithms.

- Managed a project from initiation to implementation overseeing the planning, functional specifications, technical specifications, development and testing.
- Worked with the client to ascertain and identify their specific requirements.
- Automated search of dependencies needed for the archive deployed on the server.
- Created a Firefox plugin for Sailendra technology and learnt new technologies like XUL, Spring, Zope/Plone, DTML or Python.

interests

In my spare time, I enjoy running, biking and playing basketball. I participated to two marathons. I also enjoy reading about and working with new technology, both software and hardware products. I love to travel and explore foreign countries to experience different languages, lifestyles and cultures.
